Professional Profile

Final-year conjoint student pursuing a Bachelor of Computer Science and Philosophy at the University of Auckland with experience across generative AI, digital solutions, data analysis and client-facing technology delivery. Experienced in collaborating with teams and clients to understand requirements, solve problems and implement practical solutions using AWS, React, TypeScript, Excel and Power BI. I strive to combine technical capability with critical thinking, and bring strong communication skills and commercial/business awareness to all ventures.

Education

University of Auckland / Bachelor's of Computer Science and Philosophy
February 2022 - November 2026, Auckland

- Conjoint degree in **Computer Science** and **Philosophy** at the University of Auckland
- Currently in my **final year** of study finishing in **November 2026**
- Specializing in the fields of **Artificial Intelligence**, **Computation Theory**, **Logic**, and **Ethics**

Experiences

Freelance Full-Stack Web Developer
November 2025 - Present

- Successfully **developed** and **deployed** multiple **websites** for different e-commerce and service businesses across the Auckland region
- Primarily used **JavaScript, Liquid,** and **Stripe** for web development/integrations
- Notable clients include **ARDY Kids** (Clothing), and **Positively You** (Tarot Service)
- Currently managing ongoing **maintenance** and **optimization** particularly with SEO, as well as **implementing** and **deploying updates** in accordance with evolving client needs

Generative AI Playground / Promptech AI
July 2025 - November 2025

- Worked in a collaborative team environment to build an educational **generative AI playground website** for Promptech AI that allows users to **test, trial, and tweak** different **AI models** side by side and compare responses seamlessly

- Leveraged multiple **AWS** services such as the **Bedrock API** and **EC2** servers for **integrating foundation models,** managing **accounts/chat logs with Cognito**, as well as using **React/Typescript** for frontend development
- Used **Stripe** to implement user wallet top ups as well as integrate wallets to prompting usage by developing fair pricing indices for each model
- **Deployed** through **AWS Amplify** as part of Promptech's proprietary website with the goal of being used as part of their educational events and hackathons

Sales Assistant / JB Hi-Fi
October 2022 - December 2023

- Delivered customer-facing technology sales support, developing product knowledge, communication skills and commercial awareness
- Worked alongside the **operations** and **administrative** teams to **create and manage monthly reports** on specialized **key performance indices** of sales staff members using **Excel** and **Power BI** as part of our Christmas period optimization plan
- Consistently exceeded expectations as a newcomer, setting the **store record** for the **highest number of extended care plans** sold in a single day by an individual employee

Tools and Skills

Cloud & AI: AWS | Amazon Bedrock | EC2 | Cognito | Azure | Generative AI

Development: Python | Java | C | C# | C++ | TypeScript | HTML/CSS | SQL

Data & Analytics: Excel | Power BI | SQL

Platforms: GitHub | Jira | Stripe

Delivery Methods: Agile | Waterfall

Professional Strengths: Client Communication | Analytical Problem-Solving | Team Collaboration
